

Innovative Teaching Practices

Course teacher: N. S. Khan

Course name: Planning and Design of Public Building

Innovation in teaching through model of **Panel Window**.

Window panels are the sheets of glass or other materials that make up a window in a building. Panel windows are windows with panels that can be separated by vertical and horizontal dividers to create a grid-like pattern or other arrangement. They can be made from a variety of materials, including glass, wood, metal, or stained glass.
